

Quick Start Guide

Smart Tag ST02

Setting Up the App

1. Download the SwiftFinder app from the Apple App Store or the Google Play Store
2. Make sure your Bluetooth on the phone is on
3. Open the SwiftFinder app
4. Follow the prompts to allow SwiftFinder access to Bluetooth and Location Service so you can see your things on a map

Removing Battery Insulation Sheet

Your smart tag comes with a battery pre-inserted. Before using the device, the battery insulation sheet must be removed (Improper removal of the insulation sheet might end up breaking it, in which case you will need to open the case and remove scraps of the broken sheet).

Attaching Your Smart Tags to Things

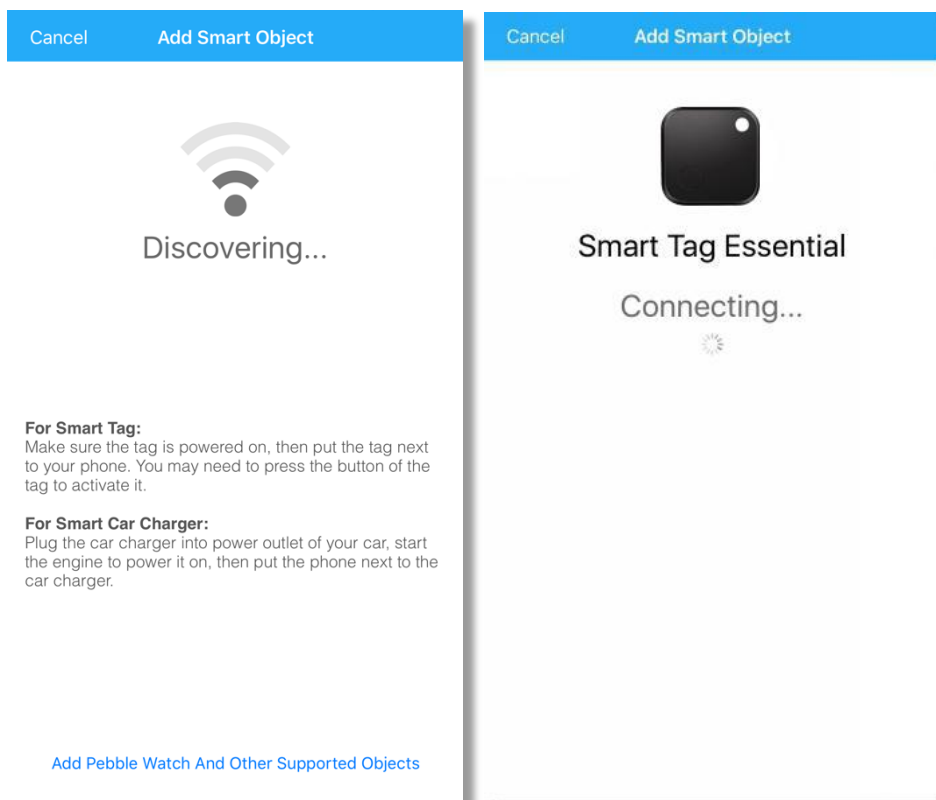

It can be anything that you want to track, like keys, bags, purses, etc.

Linking Your Smart Tags to the App

1. Tap the + button on the Things tab of the app

2. Wait for the app to discover and connect the smart tag

3. Tap the save button on upper right corner of the app
4. Optionally you can take a picture of the thing that the smart tag is attached to and name it
5. Be happy because now you can always find your stuff!

Replacing Battery

The pre-inserted CR2032 button cell battery is user replaceable. In case your smart tag runs out of power, please follow the following instructions to replace the battery.

1. Open the case from the corner as shown in the image illustrated
2. Remove old battery and insert new battery with + sign facing up
3. Close the case

Support

For technical support, advanced features, and usage tips, please send email to: cs@swiftfinder.net

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure condition without restriction.

FCC ID: 2AMMQ- ST02
